Subject Re: Fw: Smokey Mountain Smelter 

Hi LeAnn,

I have learned that the scope of the removal action for the Smokey Mountain Smelter Site has changed since we last spoke. Instead of performing a full removal action at this time, EPA would like to first have access to the property to erect a fence around the property to prevent access to the site and to strategically move some items on the property. I would like to set up a conference call tomorrow with you and the On-Scene Coordinator, Matt Huyser, to allow Matt to describe in more detail the action that EPA would initially like to perform at the site. Are you available for a call tomorrow (Thursday) at 1:00 p.m. est. If this is not a good time for you, I would appreciate your letting me know a time that would be convenient for you.

Thank you.

Teresa

Subject Fw: Smokey Mountain Smelter

Dear LeAnn,

I appreciate your talking with me today regarding EPA's efforts to obtain access to perform a removal action at the Smokey Mountain Smelter Site. Pursuant to your request, I have attached a report prepared for EPA dated July 13, 2007 assessing the groundwater and soil contamination at the Site (at the bottom of the forwarded email). This is a large file. If you are unable to open it via email, please let me know and I will send it to you in a CD. After you have reviewed the material, I will be happy to set up a conference call with you, your client, and the On-Scene Coordinator to discuss in detail the work that EPA will perform during the removal action.

Again, I appreciate your contacting your client to find out if she has a current telephone number or address where I can reach her brother and her father's wife.

I look forward to working with you to resolve the access issues.

Best Regards,  
Teresa Mann
